

2.22.23

RAILROAD OPERATIONS

WE ARE ALWAYS TRAINED.

Railroad operations require special construction work rules.

- All employee-owners working within 25 feet of the center of the track are required to be trained in railroad operations and complete a Form B. Specific safety requirements will be stated on Form B and must be adhered to.
- Orange hard hats are required while working on the railroad right-of-way.

TRAINING

If you will be working on the railroad right-of-way, you will need railroad-specific training. Please contact the Safety Department to get signed up for this training.
